EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Tod A. Myrum on 9/27/05.

The application has been amended as follows:

IN THE SPECIFICATION:

At page 1, paragraph 0001, line 2, after the phrase "October 16, 2001," insert "abandoned."

IN THE CLAIMS:

Cancel the non-elected claims 1-18 and also cancel claims 35-38.

Claim 39 is amended as follows:

39. (Currently amended) A method of ~~manufacturing a print head~~ forming a cavitation layer of a print head comprising:

forming a first dielectric layer overlying at least a first portion of a substrate using atomic layer deposition;

forming a second dielectric layer having a first portion overlying at least a second portion of the substrate and a second portion, different from the first portion, overlying at least a portion of the first dielectric layer;

forming a cavitation layer overlying the first dielectric layer and in lateral contact with the first portion of the second dielectric layer using atomic layer deposition; and

forming a third dielectric layer only on the second portion of the second dielectric layer using atomic layer deposition, ~~and not on the cavitation layer.~~

2. The following is an examiner's statement of reasons for allowance: The prior art does not teach a process of forming a cavitation layer of a print head including the steps of forming a cavitation layer overlying the first dielectric layer and in lateral contact with the first portion of the second dielectric layer using atomic layer deposition and then forming a third dielectric layer only on the second portion of the second dielectric layer as the context of claim 39.

3. The closest prior art Hawkins (4,532,530) teaches a method of fabrication a printing head or fluid ejecting device, wherein a tantalum layer (46) is deposited as a protection layer, which resembles the claimed cavitation layer (col.5, lines 34-37 and figure 4A) but fails to teach forming a cavitation layer, which is in lateral contact with the first portion of the second dielectric layer and then forming a third dielectric layer only on the second portion of the second dielectric layer as the context of claim 39.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shamim Ahmed whose telephone number is (571) 272-1457. The examiner can normally be reached on M-Thu (7:00-5:30) Every Friday Off.
